FAQ for Observation Systems

FAQ for Observation Systems

QUESTION:
What is the maximum length I can have between the camera and the monitor?

ANSWER:
The maximum length you can have between the camera and monitor is 300'.

QUESTION:
Can I place the camera outside my house or office?

ANSWER:
This Camera Observation System is designed for internal use only. You, therefore, cannot place this camera outdoors.

QUESTION:
How many cameras can I connect to the camera system?

ANSWER:
You can connect up to 8 cameras to your Observation Camera System. The monitor has push buttons,allowing you to view all 8 cameras at once or individually.

QUESTION:
Can I record the event I see on my monitor?

ANSWER:
Yes, you can. You need a normal VCR if it is a manual recording. However, if you need to record for a long time while you are away from home or office, you will need a special VCR such as Time lapse VCR or Event recorder (SG 7924 or SG 7960).

QUESTION:
Even though I had connected my monitor to the VCR , I do not get any picture on the tape?

ANSWER:
First of all, make sure the connection is correct. If so, make sure the VCRs channel selection is not between CH1 and CH181. It should always be on Video mode, for example AUX, LINE or VIDEO. Please see the attached connection diagram.

QUESTION:
Can I connect any speciality camera or wireless camera to the monitor?

ANSWER:
Absolutely! The only thing you have to do is purchase CVA6922 (6 pin din-> RCA).
