**WATERPROOF HIGH DEFINITION
VIDEO CAMCORDER**

Quick Start Guide
English Version 1.0

ACTIVE
LSC004

Getting Started

1. Open the side door.
2. Connect the mini-USB cable to the camera. Connect the other end to your computer.

3. Charge the camera for **5 hours** to fully charge.
4. Disconnect the USB cable from the camera and insert a microSD card (not included) into the camera and push it down until it clicks into place.

NOTE: The camera can support microSD cards up to a maximum size of 32GB.

5. Close the side door of the camera. Make sure it locks into place to ensure a waterproof seal.

6. Press and hold the **Power** button to turn on the camera.

7. Press the **Video** button on the top of the camera to start recording. Recording time appears at the bottom of the screen. Press it again to stop recording.

OR

Press the **Picture** button to take a picture.

Remote Control

A remote control with a wrist strap is included for easier control of the camera, especially while the camera is mounted to a helmet or surf board.

NOTE: When LCD screen is off, first press will turn on the LCD screen but not start recording or take a picture.

Playback Mode

Use Playback Mode to view your pictures and videos directly on the camera, and delete the ones you don't want to free space on your microSD card.

To access Playback:

1. Press **▶ ||** to open Playback Mode.

2. Press **◀ ▶** to select the video or picture you want to view, and press the **Picture** button to change between Videos and Pictures.

3. Press **▶ ||** to open a video or picture. Press again to start playing a video.
4. Press **Menu** to close the currently selected video or picture. Press the **Video** button to exit Playback Mode.

To delete files:

1. In Playback Mode, press **◀ ▶** to highlight the video or picture you want to delete and press **Menu**.
2. Press **◀ ▶** to select **Yes** and then press **▶ ||** to delete.

System Requirements

- **PC:** Windows 7
- **Mac:** OS 10.5 or higher
- Minimum 10GB free hard drive space to save recordings

Accessing/Saving Pictures and Videos on your Computer

1. Connect the mini-USB cable to the camera and connect the other end to your computer. The computer will recognize the camera and automatically install drivers.
2. **Windows:** An Autorun window appears. Click **Open folder to view files**. If Autorun does not appear, open Computer and double-click **Removable Disk**.

Autorun window

OR

Mac: Double-click the removable disk folder on the Desktop.

Removable disk folder

NOTE: If the camera does not appear and the Indicator LED is red, the camera is charging. Press and hold the Power button to enter USB drive mode.

3. Double-click the **DCIM** folder then the **100MEDIA** folder to access your videos or pictures.
4. Double-click videos or pictures to open. Copy videos or pictures to a folder on your computer to save them to your hard drive.

NOTE: Your videos are saved in .mp4 format and pictures are saved in .jpg.
