Lorex Smart Home Security Center

A versatile and expandable security system without monthly fees.
Plus, local built-in storage, to keep your footage private and secure.

Enhance your home security experience with the Lorex Smart Home Security Center. View and control all your Lorex cameras and connected devices from a central location with a user-friendly touch screen displaying live and recorded views from multiple cameras simultaneously. You can install the included wire-free cameras indoors or outdoors.

The Smart Home Security Center assures privacy with a built-in camera cover with a microphone mute switch, facial unlock, and the option to use the system in offline mode.

The Lorex Smart Home Security Center is a Network Video Recorder (NVR) but unlike the traditional NVR, it comes with a touchscreen display. It also allows you to pair with wireless cameras. Video recordings are stored on the pre-installed MicroSD card for greater privacy and security.

Want a video doorbell for your front door? Or how about a floodlight camera for the garage? With an on-screen device setup, you can add up to eight Lorex Wi-Fi devices and expand your security system to match your needs. It can connect up to 32 sensors and can also be used for audio streaming (from your smartphone).

The versatile LSHSC allows you to integrate your existing Lorex 1080p and additional 2K security cameras, if required, to accommodate your evolving needs.

Touch, Talk, Record, and View— the Lorex Smart Home Security Center is a one-stop solution for your home monitoring needs.

Connectivity and Control
Observe and control all your Lorex cameras and connected devices from a central location. Stay connected and receive notifications through the Lorex Home app while away.

Works smarter for you
An easy-to-use touch-screen interface allows for efficient home monitoring for users of all ages.

Enhanced Privacy
Pair Lorex devices directly to the LSHSC to store footage, ensuring privacy as the footage is not saved on the cloud. It serves as a backup in case your security camera or doorbell is stolen.

Exceptional Value
There are no expensive or hidden monthly cloud fees thanks to secure, built-in storage.

Set-up seamlessly
Home monitoring has never been easier! Installation and set-up can be completed in minutes.

Always have room to grow
Mix and match additional Lorex devices and accessories to create the perfect smart home monitoring for your family.

LOREX® Smart Home Security Center

The Heart of Security

Enjoy complete control of the Smart Home Security Center at your fingertips. Merely swipe your screen to access the key features and view up to four cameras at a time. You can view all the sensors connected to the Lorex Home Center as well.

No Monthly Fees

Your footage is safely stored on the security-grade MicroSD card located within the device. Upgrade the storage to a maximum of 256GB MicroSD or 1TB SSD.

Versatile Security Systems

Add a variety of Lorex wireless devices like indoor/ outdoor Wi-Fi cameras, doorbells, floodlights, and sensors to your Lorex Smart Home Security Center for a personalized monitoring solution.

Seamless Set up

The all-in-one security system is easy to install, and the intuitive touch screen directions facilitate easy setup. Follow the simple on-screen instructions to pair additional Lorex devices as needed.

Enhanced Privacy Features

Face Unlock

Login to the Lorex Smart Home Security Center quickly with the Face Unlock* feature.

Camera Cover

Cover the lens of the built-in camera if you're not using the Face Unlock feature.

What's in the box

Lorex Smart Home Security Center   64GB MicroSD   Power Adapter   Ethernet Cable   Quick Start Guide

Disclaimers:
1. Video is captured and can be exported in full resolution based on the maximum resolution supported by the camera and the resolution settings the resolution as per custom user setting.
2. Compatible with certain Lorex devices only. For a list of compatible devices please visit www.lorex.com/compatibility
3. Accessing your security system remotely requires a high-speed Internet connection. Ensure your recorder has a connection to a router (not included). An upload speed of 100 Mbps Ethernet or 5GHz Wi-Fi is recommended for remote video viewing.
4. Image quality and frame rate are dependent on the distance and types/locations of objects between the devices and the Lorex Smart Home Security Center. An optional Range Extender (model # AX62TR) is available to further extend the range (not included).
5. The Lorex Home Center can be connected to your home router wired (using included CAT5E cable) or wireless. Lorex always recommends using a wired connection whenever possible. For a wireless connection, you will need a home router supporting dual band (2.4/5Ghz) and the 5GHz network needs to be accessible.
6. The Lorex Home Center supports offline use which does not require a home router. It does mean that you will not be able to access it remotely using the Lorex Home App.

Lorex products are designed for consumer and business use only and not for US federal governments, federally-funded projects or contractors subject to NDAA.

* Devices stream by default using substream at lower resolution.
