Connecting your system

1. Monitor/TV

For best performance it is recommended to use a 1080P monitor/TV and set the DVR’s output resolution to 1920x1080. See the instruction manual for details.

2. Mouse

3. Cameras

Recommended: Connect cameras to NVR

OR

Connect cameras to a PoE Switch* or Router* on your network. See “Adding cameras from the LAN” on reverse for more details.

4. Router*

5. Power

8-channel configuration shown. Other channels will have the respective number of video inputs. For camera compatibility information, visit www.lorextechnology.com/support

*Not included/sold separately

This system features automatic firmware upgrades for enhanced functionality. It is required to upgrade your system to the latest firmware version.

If a firmware upgrade is available:

1. After startup, a notification will appear asking you to upgrade the firmware. Click OK to upgrade.

2. The system will download and install the firmware upgrade. Wait for the firmware update to complete. The system may restart during the firmware upgrade process. DO NOT power off or disconnect the power cable during firmware installation.
1. **Left-click:**
   - Click to open the Navigation Bar. Right-click to close the Navigation Bar.
   - **During split-screen display mode:** Double-click an individual channel to view it in full-screen. Double-click again to return to the split-screen display mode.
   - **While navigating menus:** Click to open a menu option.

2. **Right-click:**
   - **During live view:** Right-click anywhere on the screen to open the Quick Menu.
   - **Within system menus:** Right-click to exit menus.

---

### Using the Quick Menu

**Right-click to open the Quick Menu.**

- **View 1**
- **View 2**
- **View 3**
- **View 4**
- **View 5**
- **View 6**
- **View 7**
- **View 8**
- **View 9**
- **PTZ**
- **AutoFocus**
- **Camera Setting**
- **Info**
- **Sequence**
- **Disable Beep**
- **Search**
- **Manual Control**
- **Device Search**
- **Main Menu**

---

### Setting the date and time

1. In live view, right-click and click **Main Menu**.

2. Log in using the system user name (default: **admin**) and password (default: **000000**).

3. **Click** and select **Setting**
   - **Click** and select **General** and select the **Date&Time** tab.
   - Enter the current time and select your time zone, and click OK.
   - Check **DST** to enable auto Daylight Savings Time updates.
   - (Optional) Check **NTP** to sync your system with an Internet time server.
   - Click **Manual Update** to instantly update the time.

   **NOTE:** A constant Internet connection is required to use NTP.

5. Click **Apply** to save changes.

It is important to set the correct time to ensure accurate time stamps on video recordings.

---

### Playback and search

1. From live view, right-click and then click **Search**.

2. Log in using the system user name (default: **admin**) and password (default: **000000**).

3. Use the calendar on the right to select the date to playback.

4. Use the drop-down menus to select the channels you would like to playback. Click the display options ( ) to playback multiple channels simultaneously.

5. Click inside the video bar to select the playback time. Playback starts immediately at the selected time.

---

If the system is beeping after startup, the Ethernet cable may not be connected or the system may not be connected to the Internet.

To stop the beeping:
1. Connect an Ethernet cable from the system to your router and restart the system. **OR**
2. Right-click and click **Disable Beep**.
