Before You Start:

Make sure you have:
- A router and high-speed Internet access (not included).
- Connected your NVR to your router using an Ethernet cable (see the Quick Connection Guide for details).
- Upgraded your NVR firmware and client software or mobile app to the latest versions. The latest versions of firmware and software are required to connect to the system.

This guide will show you how to set up your new Lorex system for connection over the Internet using a PC, Mac, Smartphone, or Tablet.

This system features connectivity using the exclusive Lorex Stratus solution. This cloud-enabled service allows for Internet connectivity without requiring any network configuration. Each system includes a Device ID, a unique code that allows your system to handshake with Lorex’s servers for a secure connection over the Internet.

Please note that an upload speed of 1Mbps is required for remote video access. Up to 3 devices* may connect to the system at the same time.

* Connecting multiple devices may affect performance depending on available upload bandwidth.

---

Smartphones (iOS & Android™)

1. Install the free Lorex netHD Stratus app from the Google Play Store or App Store.
2. Tap the Lorex netHD Stratus icon to open the app.
3. Tap Live View.
4. Press the QR code icon next to Device ID and line up the QR code on top of the NVR with the camera on your device.

**Device ID:** xxxxxxxxx

**OR**

If your device does not have a camera, manually enter the Device ID printed on the label.

**NOTE:** If you have changed the User Name, Password, or Client Port from the defaults, you will need to update them.

4. Tap Start live view.

Congratulations! You can now view video from your cameras on your smartphone or tablet.

---

Tablets (iOS & Android™)

1. Install the free Lorex netHD Stratus Plus app from the Google Play Store or App Store.
2. Tap the Lorex netHD Stratus Plus icon to open the app.
3. Tap +.
4. Enter a name for your NVR of your choice.
5. Press the QR code icon next to Device ID and line up the QR code on top of the NVR with the camera on your device.

**Device ID:** xxxxxxxxx

**OR**

If your device does not have a camera, manually enter the Device ID printed on the label.

**NOTE:** If you have changed the User Name, Password, or Client Port from the defaults, you will need to update them.

4. Tap Save.

You will be prompted to change the NVR password. Enter a new 6 character password and tap **Confirm**. This password will be used to connect to your system from now on.

1. Tap Start live view.

Press and drag the NVR to the viewing area to open all connected cameras.
2 Find your Device ID

The **Device ID** is printed on a label on the top panel of the NVR.

![Device ID QR Code]

Record your information below:

DEVICE ID: xxxxxxxxxxx

---

**Quick Reference**

**Default access information:**
- Default user name: **admin**
- Default password: **000000**

See the label on top of your NVR for your Device ID.

**Default system ports:**
- HTTP Port: **80**
- Client Port: **8000**
- Mobile Port: **1025**

If you have forgotten your password, contact Lorex technical support.

**It's all on the Web**

Software and complete instruction manual available on:
[www.lorextechnology.com](http://www.lorextechnology.com)

---

**PC/Mac Users**

**a** Install **Lorex Client Software** from the CD or from [www.lorextechnology.com](http://www.lorextechnology.com).

**b** Double-click on the **Lorex netHD Stratus Client** icon on your desktop. The Client Software opens to the Add NVR Wizard.

**NOTE:** If the Add NVR Wizard doesn't open, click **Help>Open Wizard**.

**c** Click **Enter Wizard**.

**d** Enter a name for your NVR of your choice

**e** Enter the **Device ID**

**NOTE:** If you have changed the Client Port, User Name, or Password from the defaults, you must update them to connect to the NVR.

**f** Click **Add**

If this is the first time connecting to the system, you will be prompted to change the NVR password. Enter a new 6 character password and click **Yes**. This password will be used to connect to your system from now on.

**g** Click **Next** 3 times, then click **Finished**.

The NVR opens in Main View and streams video from your cameras.

---

**Congratulations!** You can now view video from your cameras on your computer.
