Quick Networking Guide

Before You Start

- Make sure you have a router and high-speed Internet access (not included).
- Connect your NVR to your router using an Ethernet cable (see the Quick Connection Guide for details).
- Upgrade your NVR firmware and mobile app to the latest versions.
- Please note that an upload speed of 2 Mbps is required for remote video streaming (3 Mbps and above recommended). Up to 3 devices may connect to the system at the same time.

Find Your Device ID

The Device ID is printed on a label on the top panel of the NVR.

Record your information below:
DEVICE ID: ________________

Connect to Your Mobile Device

1. Install the free FLIR Secure™ app from the App Store or Google Play Store. Tap the FLIR Secure™ icon to open the app.
2. Tap SIGN UP and enter your email address and password to create a new account.
3. Tap +, then tap Security System.
4. Use the camera of your mobile device to scan the QR code on top of your NVR.

If you cannot scan the QR Code, tap and enter the Device ID located under the QR code.

Important: Make sure your device is on and connected to the network.

Visit us online for up-to-date software and complete instruction manuals.

Quick Reference

Visit www.lorextechnology.com

Search the model number of your product

Click on your product in the search results

Enter the NVR’s Username (default: admin), and the NVR’s Password (default: 000000).

Enter the NVR’s Username (default: admin), and the NVR’s Password (default: 000000).
