**Quick Networking Guide**

1. **Find Your Device ID**
   - The **Device ID** is printed on a label on the top panel of the NVR.
   
   ![QR Code Image]

   **ID: xxxxxxxxxxx**

2. **Connect to Your Mobile Device**
   - Install the free FLIR Secure™ app from the App Store or Google Play Store. Tap the FLIR Secure™ icon to open the app.
   - Tap **SIGN UP** and enter your email address and password to create a new account.
   - Tap **ADD DEVICE**, then tap **Security System**.
   - Use the camera of your mobile device to scan the QR code on top of your NVR.
   - **NOTE:** If this is not the first device on your account, tap and then tap **Security System**.
   - If you cannot scan the QR Code, tap and enter the **Device ID** located under the QR code.

**Before You Start**
- Make sure you have a router and high-speed Internet access (not included).
- Connect your NVR to your router using an Ethernet cable (see the Quick Connection Guide for details).
- Upgrade your NVR firmware and mobile app to the latest versions.
- Please note that an upload speed of 2Mbps is required for remote video streaming (3.5Mbps or above recommended). Up to 3 devices may connect to the system at the same time.

**Connect to Your Mobile Device**
- Enter the NVR’s Username (default: admin), and the NVR’s Password (default: 000000). Tap **Done**.
- Enter a new unique name for your device and tap **NEXT**.
- Enter a new unique 6 character password and tap **DONE**. This password will be used to log on to your system from now on.

**Need Help?**
- Visit us online for up-to-date software and complete instruction manuals.
  - **Visit** www.lorextechnology.com
  - **Search the model number of your product**
  - **Click on your product in the search results**
  - **Click the Downloads tab**

**Troubleshooting**
- If you are having trouble connecting, try the following:
  - Restart the NVR using the power switch.
  - Ensure the NVR is connected to the router using an Ethernet cable and then restart the NVR.
  - Double check the Username, Password, and Client Port.
  - Ensure your NVR has the latest firmware.
  - For slower Internet connections, reduce recording or display settings for substream.

**Quick Reference**
- **Default access information:**
  - Default user name: admin
  - Default password: 000000
- See the label on top of your NVR for your Device ID
- **Default system ports:**
  - HTTP Port: 80
  - Client Port: 35000
- If you have forgotten your password, contact Lorex technical support

**Important:** Make sure your NVR is powered on and connected to the network with the included Ethernet cable.

**Finished:** You can now view live video from your cameras on your mobile device.
