

# LW2004AC1 SERIES ADD-ON CAMERA

## Quick Start Guide

### Contents:

### TIP

Before you install the camera, carefully plan where and how it will be positioned, and where you will route the cable that connects the camera to the power adaptor.

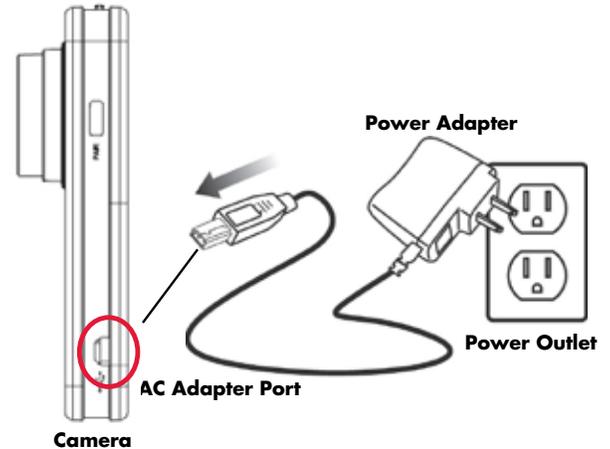

Avoid installing in a location which requires the wireless signal to pass through cement, concrete and metal structures. This will reduce the transmission range.

### Powering up the Camera

1. Screw the camera stand into the stand mounting hole at the back of the camera, and place the camera on a flat surface.
2. Connect the AC power connector from the power adaptor into the AC adapter port on the side of the camera.
3. Plug the power adaptor into a power outlet.
4. Press and hold the power button at the top of the camera for 3 seconds to power on the camera.

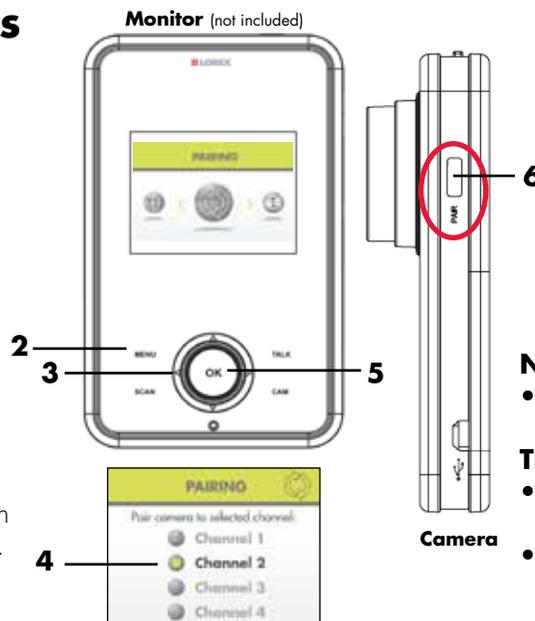

#### NOTE:

- Only use the included power adaptor to power the camera(s).

### Pairing up Cameras

1. Make sure the camera you would like to pair up is powered on.
2. Press the **MENU** button on the monitor to enter the menu screen.
3. Press the **◀ ▶** buttons until the **PAIRING** icon is highlighted and press **OK**.
4. Select the channel you wish to pair up the camera to by pressing the **▲ ▼** buttons.
5. Press **OK**.
6. Press and hold the **PAIR** button on the side of the camera until the monitor displays "Device Found" indicating that the camera has been successfully paired with the monitor.

#### NOTE:

- The monitor can connect to up to 4 cameras.

#### TIPS

- The camera and monitor should be around 1 ft. apart during the pair up process.
- Immediately after successful pairing, move the camera and monitor apart to avoid speaker feedback.
