A. Installing the Camera

1. Mount the camera to the wall or ceiling using the included screws. Use the included anchors as needed.

NOTE: If you run the cables along the wall/ceiling, you must run the cable through the cable notch on the base. This will keep the camera base flush to the wall/ceiling when mounted.

2. Adjust the angle of the camera until the desired view is set. Tighten the screws and the adjustment ring to secure the camera position.

   A) Turn the adjustment ring to tighten/loosen the stand connection.
   B) Loosen the lower screw with the Allen key to adjust the camera’s vertical position.
   C) Loosen the upper screw with the Allen key to rotate the camera housing.

For outdoor use, installation in a sheltered location is recommended.

B. Installing the Receiver

If mounting the receiver outdoors, refer to the example below. If installing the receiver indoors, proceed to “Connecting to an MPX/HD DVR”.

Outdoor Receiver Installation

3. Connect the camera power adapter to the camera. Connect power adapter to a power outlet.

Power cables are only weatherproof when fully inserted at the connection point. Power cables should not be submerged in water.

4. Remove protective film from the camera lens.

C. Connecting to an MPX/HD DVR

1. Connect the BNC cable to your MPX/HD DVR’s video input.

2. Connect the receiver power adapter to the receiver. Connect the power adapter to a power outlet.

3. Press the PAIR button on the receiver.

ATTENTION: Make sure to first connect and power on the camera before powering on the receiver.

NOTE: The camera and receiver have already been paired out of the box. If for some reason the pairing is lost, follow these steps to pair up the camera and receiver.

4. Press the PAIR button on the back of the camera within 30 seconds of pressing the PAIR button on the receiver. If successful, live video from the camera will appear on the monitor.

**720p cameras are compatible with Lorex’s 720p & 1080p HD DVR recorders only.

NOTE: If you run the cables along the wall/ceiling, you must run the cable through the cable notch on the base. This will keep the camera base flush to the wall/ceiling when mounted.

Installation Tips

- Before you permanently install your camera:
  - Plan where and how it will be positioned.
  - Determine where you will route the cable that connects the camera to the power adapter.
  - Verify the camera’s performance by observing the image on a monitor when the camera is positioned where it will be permanently installed.
  - Avoid installing the camera in a location where the wireless signal must pass through cement, concrete, or metal structures. This will reduce the transmission range.

For support and instructions:

1. Visit www.lorextechnology.com
2. Select your product from the search results
3. Click on the Downloads tab

NOTE: It is not recommended to install more than 3 digital wireless security cameras in the same environment to maintain optimal video frame rate performance.
